Introduction

Media nowadays is considered as the authority of the soft impact as it dominates many a tool and its print, audible and visual means and has the power to steer the public opinion and to expose truth. Therefore it is to pay heed to it, in the contemporary struggling world it turns to, for the dominant, be instrumental in distorting the memory and to, for the deceptive, be a trick to falsify and change facts.

For the criticality of such an issue , the Al-`Ameed conference in its sixth version sets it a title to trace its research avenues to be tackled by the quills of researchers, scholars and specialists to touch its origin , to explicate it and recommend certain remedies to rectify its orbit .

Missions:

- 1- Monitoring the discourse of the media foundations and their platform to distinguish between the objective and the nonobjective
- 2- Stimulating quills of researchers and specialists in various knowledge fields to explicate media discourses and manifest the negative targets to confuse the memory of communities and to cripple their nexus with the specific scientific ones.
- 3- Having recourse to past experiences endeavoring to establish procedures of shielding and preventing the negative targeting by the nonobjective media and offering objective alternatives to regain stability for the targeted communities.
- 4- Focusing on media deception tools to be averted.
- 5- There should be a communal immunity for not abating the communal solidarity and scattering its word.

Conference Axes

- 1-Nonobjective Media : Concept , Reasons and Repercussions
- 2-Religious Field in Confrontation of Deceptive Media.
- 3-Political Performance and Biased Media.
- 4-Protection from Nonobjective Media
- 5-Nonobjective Media and Its Impact on the Community
- 6-Arabic Epistemic Legacy in response to Authority Media.
- 7-Terrorism and Media Exploitation.
- 8-Contemporary Digital Means and Media Authority.
